

High Energy Planetary Ball Mill F-P2000

Item Number: KT-P2000

Introduction

Experience fast and effective sample processing with the F-P2000 high-energy planetary ball mill. This versatile equipment offers precise control and excellent grinding capabilities. Perfect for laboratories, it features multiple grinding bowls for simultaneous testing and high output. Achieve optimal results with its ergonomic design, compact structure, and advanced features. Ideal for a wide range of materials, it ensures consistent particle size reduction and low maintenance.

[Learn More](#)

Product name	High energy planetary ball mill
Model	F-P2000
Processing principle	impact force friction
Application sample characteristics	fine medium to low hardness brittle dry or low viscosity
Processing type	crush grind mix
Maximum injection size	10mm
Sample particle size range	0.1-20um
Maximum processing volume	2000ml
Maximum speed of ball mill tank	800r/min
Transmission mode	European standard
Space movement mode	X-axis planetary motion
Function	Continuous and intermittent operation Emergency stop Timing Power outage memory Overload and hazardous operation protection
Additional features	LED Lighting Heat Dissipation
Ball mill tank material	Tungsten carbide zirconia agate stainless steel MC nylon and other optional
Number of ball mill tanks	4□
Ball mill tank volume	500ml
Grinding ball material	Tungsten carbide zirconia agate stainless steel, etc. optional
Grinding method	Dry grinding Wet grinding
Electrical Description	100-120V/200-240VAC,50-60Hz,750W
Power port	National Standard European Standard American Standard British Standard, etc.

Net weight	92kg
Dimensions (length, width and height)	570*570*420mm
Protection level	IP650
Standard	CE
Additional configurations available	Ultra-low temperature liquid nitrogen cooling touch operating system

Main accessories	Recommended standard configuration volume: 500ml	√: means it can be configured	x: indicates that it cannot be matched
