

## Ptfe Culture Dish/Evaporation Dish/Cell Bacteria Culture Dish/Acid And Alkali Resistant And High Temperature Resistant

**Item Number: PTFE-26** 

## Introduction

The Polytetrafluoroethylene (PTFE) culture dish evaporating dish is a versatile laboratory tool known for its chemical resistance and high-temperature stability. PTFE, a fluoropolymer, offers exceptional non-stick properties and durability, making it ideal for various applications in research and industry, including filtration, pyrolysis, and membrane technology.
