

Ptfe Reagent Bottle/Wide -Mouth Bottle/Fine Mouth Bottle/Sample Bottle/High Temperature Ptfe

Item Number: PTFE-24

Introduction

The PTFE Reagent Bottle, also known as PTFE Chemical Bottles or Teflon Reagent Bottle, is a robust alternative to traditional glass reagent bottles. These bottles are highly resistant to both acids and alkalis, featuring a leak-proof screw cap. Ideal for laboratory use, they offer excellent chemical resistance, high temperature capabilities up to 260°C, and superior durability.
