

# Special Shape Press Mold

Item Number: PMT

## Introduction

Discover high-pressure special shape press molds for diverse applications, from ceramics to automotive parts. Ideal for precise, efficient molding of various shapes and sizes.

| Instrument model                       | PMT                       |
|--|---------------------------|
| Sample shape                           |                           |
| Die heating                            | Alloy tool steel :Cr12MoV |
| Indenter hardness                      | HRC60-HRC62               |
| Sample size                            | Φ6□Φ8□Φ10□Φ15□Φ20mm(M)    |
| Cavity depth                           | 40mm (N)                  |
| Dimensions                             | Φ53*120mm (L*H)           |
| Weight                                 | 1.4Kg                     |
